## STATE LICENSING BOARD FOR CONTRACTORS

2525 Quail Drive • Baton Rouge, Louisiana 70808-9042  
(225) 765-2301 • Fax (225) 765-2362

### **Types of Work Regulated by both the Louisiana State Licensing Board for Contractors and the Louisiana State Fire Marshal**

Contractors who perform the types of work noted below must also hold a separate license with the Louisiana State Fire Marshal, except when the work is done by contractors holding the Electrical Work (Statewide) license with this Board. Contractors holding the Mechanical Work license with this Board may install piping for fire sprinkler work or fire suppression systems without additional licensing from the State Fire Marshal. Contractors holding Residential Construction or Building Construction may install or remove complete mechanical lock sets in a house or building they are building without a separate classification or a Fire Marshal license endorsement.

In an effort to reduce duplication between the Louisiana State Licensing Board for Contractors and the Louisiana State Fire Marshal's Office, the following classifications are available from this Board for specialty contractors.

Please note that licensed Electrical Work contractors with this Board do not need the classifications below. However, specialty contractors applying for any of these specialty classifications must show proof that they hold [a license with the State Fire Marshal](#) for such work.
